Sarasota County's online GIS is revitalized

Along with a migration to the newest GIS web technology, ArcGIS Server, Sarasota County's GIS department will feature some new improvements beginning Monday, Nov. 16.

Besides being faster, the ArcGIS server will offer a more stable platform so users of the site at <http://gis.scgov.net> will experience fewer crashes and a modern interface. The newest 2009 aerial images have been uploaded to the site and new GIS layers were added to provide more information in one site. Searching includes parcel number, owner name or address.

For first time users, a Help file at <http://ags.scgov.net/info/PropertyLookUp.pdf> provides useful information.

For more information, call the Sarasota Call Center at 941-861-5000 and ask for the GIS department or visit the county's Web site at www.scgov.net and select Geographical Information System from the Sarasota County A-Z link.
