## **County commissioners to discuss Fruitville charrette results today**

Sarasota County commissioners will meet in a special session at 2 p.m. today to discuss the results of the Fruitville charrette. The meeting will be in the Commission Chamber, County Administration Center, 1660 Ringling Blvd., Sarasota.

Members of the Pasadena-based firm of Moule & Polyzoides, Architects and Urbanists, which facilitated the charrette, will present the results of the week-long endeavor. Sarasota County and neighboring property owners initiated the charrette, which began April 12, to explore an urban design and potential build-out plan for the 325 acres north and south of Fruitville Road east of Interstate 75.

A charette is a multi-day workshop used by planners to involve residents and business owners in the design and planning for site development or redevelopment.
